## Chapter 1: Overview

---

## 1.1 DIAStudio Integrated Engineering Software

The DIAStudio is an all-in-one integrated engineering platform, on which user can efficiently develop machinery systems, from product selection, programming, to exporting.

It simplifies the process, and helps to save time and cost for building machinery systems.

Figure 1 - 1: DIAStudio Features

### 1.1.1 Key Software

The DIAStudio comprises of 5 key software:

- **DIASelector:** Quick, easy, smart selection tool.
- **DIADesigner:** Integrated development & engineering software.
- **DIAScreen:** Intuitive visualization software.
- **DIAInstaller:** System installation & update management
- **COMMGR:** Communication management
- **DIADesigner-AX:** Motion Control Programming Software

The DIAStudio supports efficient and flexible data transmission between software. It also facilitates for tag sharing between software.

## 1.2 DIAInstaller Introduction

The DIAInstaller is a software installer, which assists user to download, install & un-install, update DIAStudio software applications. User can download, install, and update products such as DIASelector, DIADesigner, DIADesigner-AX, DIAScreen, and COMMGR.

The key features of DIAInstaller are:

- Install and uninstall the products.
- Check for the latest product updates.
  - Check Manually.
  - Set an automatic check for update of products at required frequency.
- Set the language. Supported languages are English, Simplified Chinese and Traditional Chinese.
- View the Copyright notice and current version of DIAInstaller.
- Download the products.
- Includes patch function to update specific components.

## Chapter 2: Getting Started

---

## 2.1 System Requirement

	<b>System Requirement</b>
Operating System	Windows 7 / 8.1 / 10 32/64 bits
CPU	Intel Celeron 540 1.8GHz (min.), Intel Core i5 M520 2.4 GHz (min.)
Memory	2GB or above (recommend to use 4GB or more)
Hard Disk Drive	10GB or more
Monitor	Resolution: 1024 x 768 Pixels, 1920 x 1080 Pixels
Keyboard/Mouse	General Keyboard Mouse or Windows compatible device
Printer	Printer that can be driven by Windows system (if you need to print project content)
Ethernet	Need network connection when down or update
Software	Browser IE 11 or above (included) Need to install Microsoft .Net Framework 4.6.2.

## Chapter 3: Installation and Uninstallation

## 3.1 Introduction

The installation and uninstallation procedures are provided in the following sections.

### 3.2 Installing DIInstaller

### 3.3 Uninstalling DIInstaller

## 3.2 Installing DIInstaller

### Pre-requisites:

Ensure that the target computer follows the minimum criteria mentioned in 2.1 System Requirement, and can be connected to Internet.

To download the software, DIAStudio registration is mandatory.

Follow the steps to install software:

1. Open the following website through browser:

<https://diastudio.deltaww.com/>

2. Click **Download center** > **Download**

Or

Go to the **Download** field of **Information** and click **Software** to open the download page. If user have not logged in, user will first enter the login page.

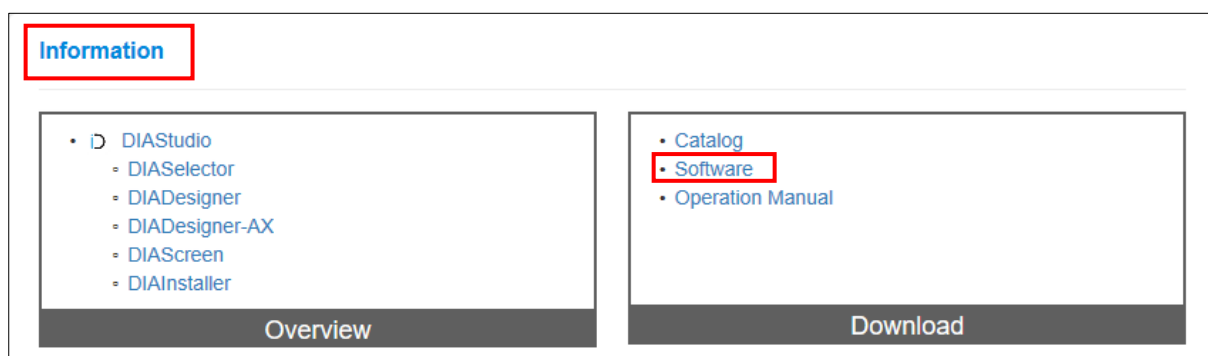

Figure 3 - 1: DIAStudio Website

3. Enter DIASStudio account information and sign in.

The image shows a sign-in form for DIASStudio. At the top is the DELTA logo. Below it, the text reads "Sign in with your existing account". There are two input fields: "Email Address" and "Password". A link "Forgot your password?" is next to the password field. A blue "Sign in" button is at the bottom. Below the button, it says "Don't have an account? Sign up now".

**Figure 3 - 2: Sign In**

4. Select the latest version of DIASStudio in the **Software Name**, and click the

Zip file in the **File** field to download it.

Software Name	Description	OS	Issue Date	File
DIASStudio V1.0	DIASStudio Software download and Installation Tool	Windows 7 / 8.1 / 10 / Server 2012 R2 32/64 bit	2020/12/14	
DIASelector App V1.0	DIASelector Mobile App	Android Lollipop (5.0) and above	2020/12/14	

Software Name	Description	OS	Issue Date	File
DIASStudio V0.5 (Early Access!)	DIASStudio Software download and Installation Tool	Windows 7 / 8.1 / 10 / Server 2012 R2 32/64 bit	2020/09/11	
DIASStudio for DIADesigner-AX Beta V0.4 (Early Access!)	DIASStudio Software download and Installation Tool	Windows 7 / 8.1 / 10 32/64 bit	2020/07/30	
DIASStudio V0.4 (Early Access!)	DIASStudio Software download and Installation Tool	Windows 7 / 8.1 / 10 / Server 2012 R2 32/64 bit	2020/05/06	
DIASelector App V0.5 (Early Access!)	DIASelector Mobile App	Android Lollipop (5.0) and above	2020/09/11	

**Figure 3 - 3: DIASStudio Website**

5. Once the download is complete, double-click **DIAInstaller.exe** in download folder and then start to install it.

**Figure 3 - 4: Intallation file**

6. Select the language, and then click on **OK** button.

**Figure 3 - 5: Select Language**

7. The operating system will ask for additional installation of Microsoft components. Please make sure that Microsoft .Net Framework 4.6.2 or above is installed. If not, user need to install it. Click on **Install** button to continue.

**Figure 3 - 6: Install**

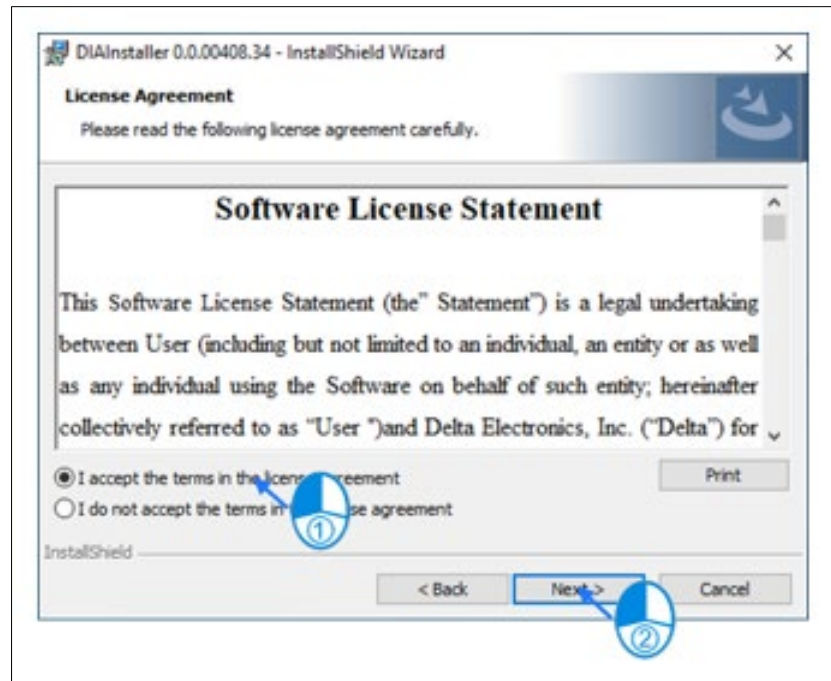

**NOTE:** Please check if Microsoft .Net Framework 4.6.2 or version above is installed in system, or it will install extra Microsoft package according to user system.

8. After installing extra packages, click on **Next** button to continue installation.

**Figure 3 - 7: InstallShield Wizard**

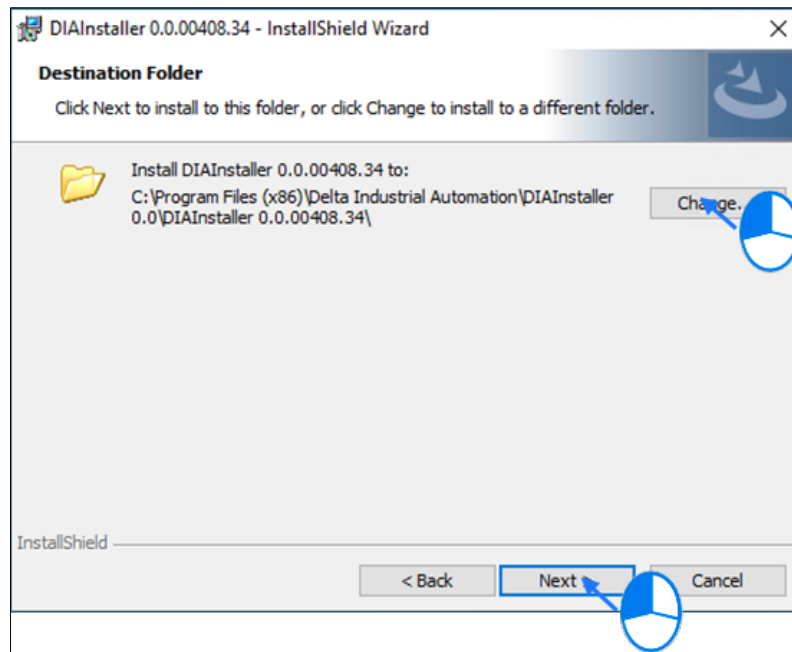

9. Read the Software License Statement carefully, if there is no further question, then, please select **I accept the terms in the license agreement** option and click on **Next** button. Else, please contact Delta Electronics Inc.

**Figure 3 - 8: DIAInstaller Software License Statement**

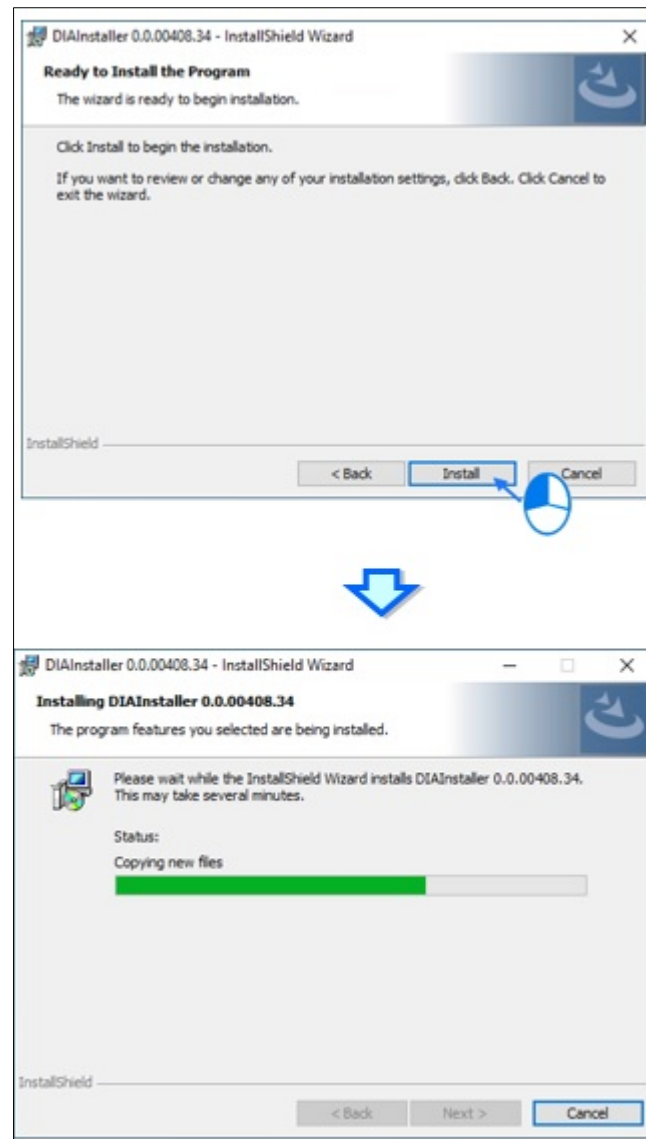

10. Confirm install destination folder, or click on **Change** button to set custom destination folder, and then click on **Next** button to continue.

**Figure 3 - 9: DIAInstaller Destination Folder Setting**

11. If there is any setting need to be changed, click on **Back** button when needed. Otherwise, click on **Install** button to start installation.

**Figure 3 - 10: Copying files to Destination**

12. Click on **Finish** button to end the installation and DIAInstaller launches automatically once the installation is complete.

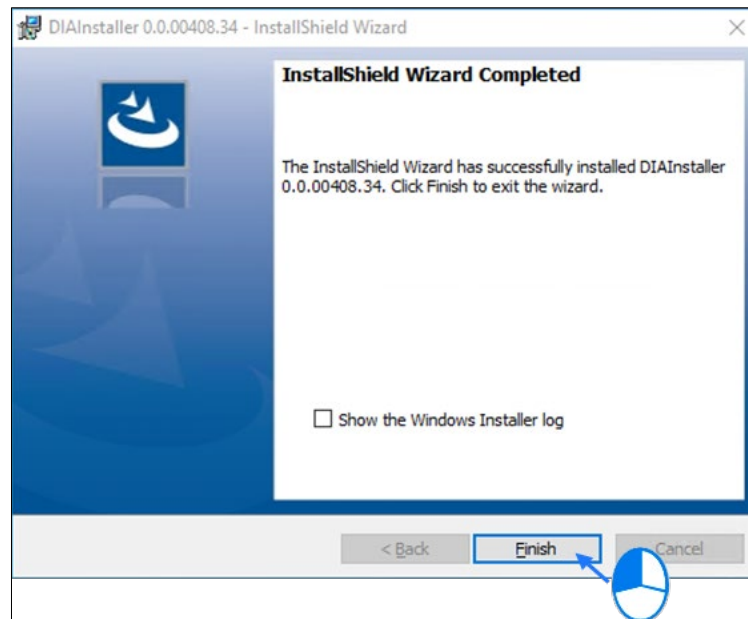

Figure 3 - 11: Installation Complete

### 3.3 Uninstalling DIAInstaller

Follow the steps to uninstall DIAInstaller:

1. Open **Control Panel**, select DIAInstaller in **Programs > Uninstall a program**, and then click **Uninstall** button.

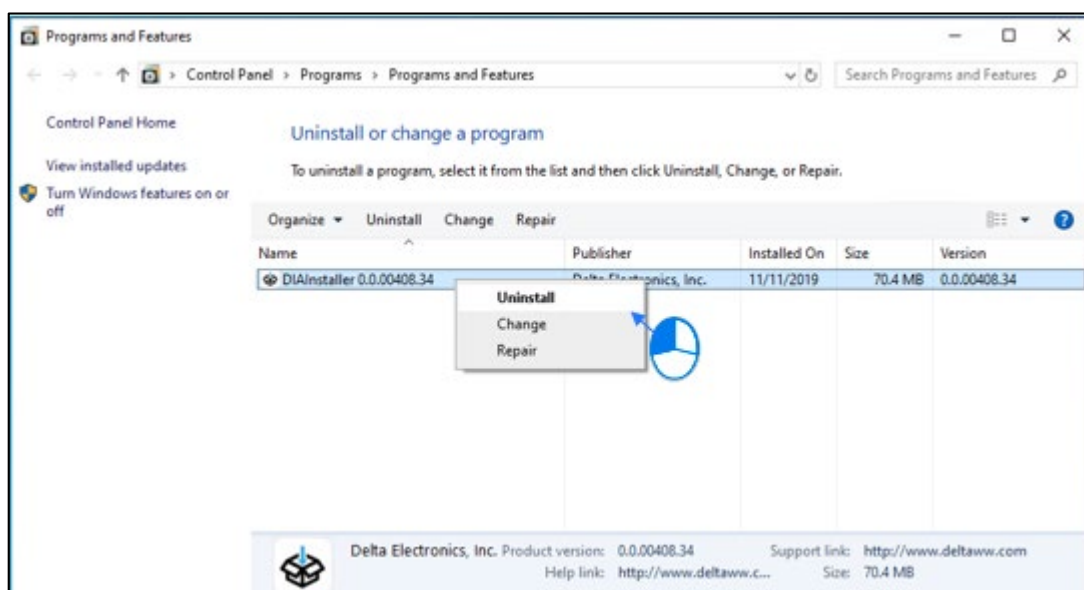

Figure 3 - 12: Uninstall DIAInstaller in Programs and Features

2. Click on **Yes** button to uninstall DIAInstaller.

**Figure 3 - 13: Confirm to Uninstall DIAInstaller**

**Result:** DIAInstaller will be uninstalled after system process is complete.

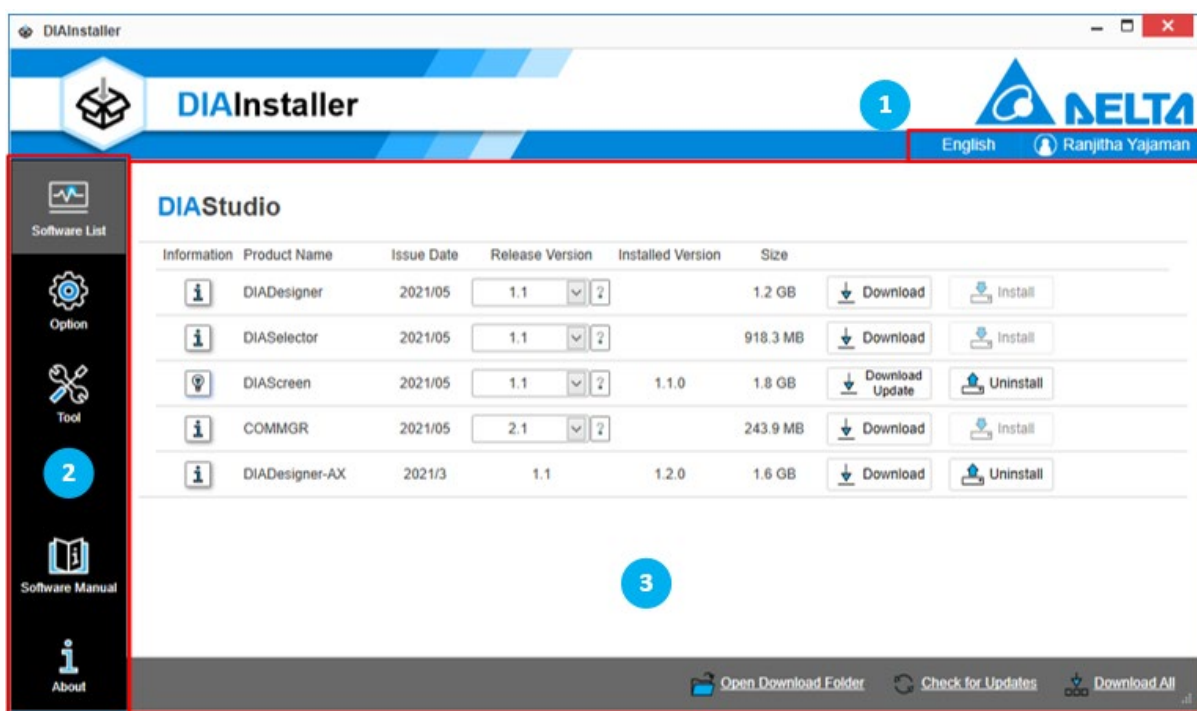

**NOTE:** *Uninstallation of DIAInstaller will not uninstall any of the DIAStudio (DIASelector, DIADesigner, DIADesigner-AX, COMMGR, DIAScreen) software products which are already installed. But, user will not be able to update any of the DIAStudio products.*

## Chapter 4: User Interface

## 4.1 UI Introduction

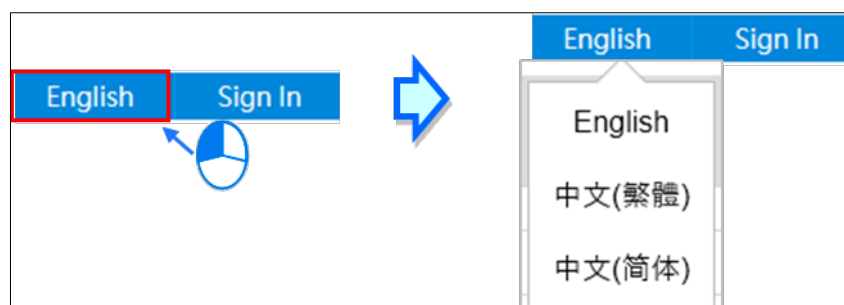

The DIAInstaller screen contains three blocks.

- 1 Language Switch and Login Function.
- 2 Function Option.
- 3 Function Screen Operation.

**Figure 4 - 1: DIAInstaller Interface**

Click the current language from block 1 to switch the language. Currently, Traditional Chinese, Simplified Chinese and English are supported, as shown in the figure below.

**Figure 4 - 2: Switch Language**

## 4.2 DIAInstaller Functions

The DIAInstaller application includes Software Status ([4.2.1 Software List Functions](#)), Option ([4.2.2 Option](#)), About, and Language Setting functions. The functions in the DIAInstaller are described in the following table.

Function	Description
Software List 	User can download, install/uninstall, and update DIAStudio related software products, including DIASelector, DIADesigner, DIASceen, DIADesigner-AX and COMMGR via Software List function.
Option 	User can do settings using this option, such as setting update frequency, download path and check for update immediately.
Tool 	View the list of DIAInstaller auxiliary tools.
Software Manual 	Click to open the DIAInstaller Software Manual
About	User can view the Copyright notice and current version of DIAInstaller.

Function	Description
	<p>When a light appears in the upper right corner of the  icon, it means that there is a newer version of DIAInstaller on the Internet. At this time, user can click in and select to start the update.</p>

### 4.2.1 Software List

The default screen of DIAInstaller is the **Software List**, which displays the supported product name, version, size, download/update, progress, installation/uninstallation, and set installation path. After logging in, user can download, install and update the products whenever they need it. Please refer to *Chapter 5: Software List Operation* for related software list operations.

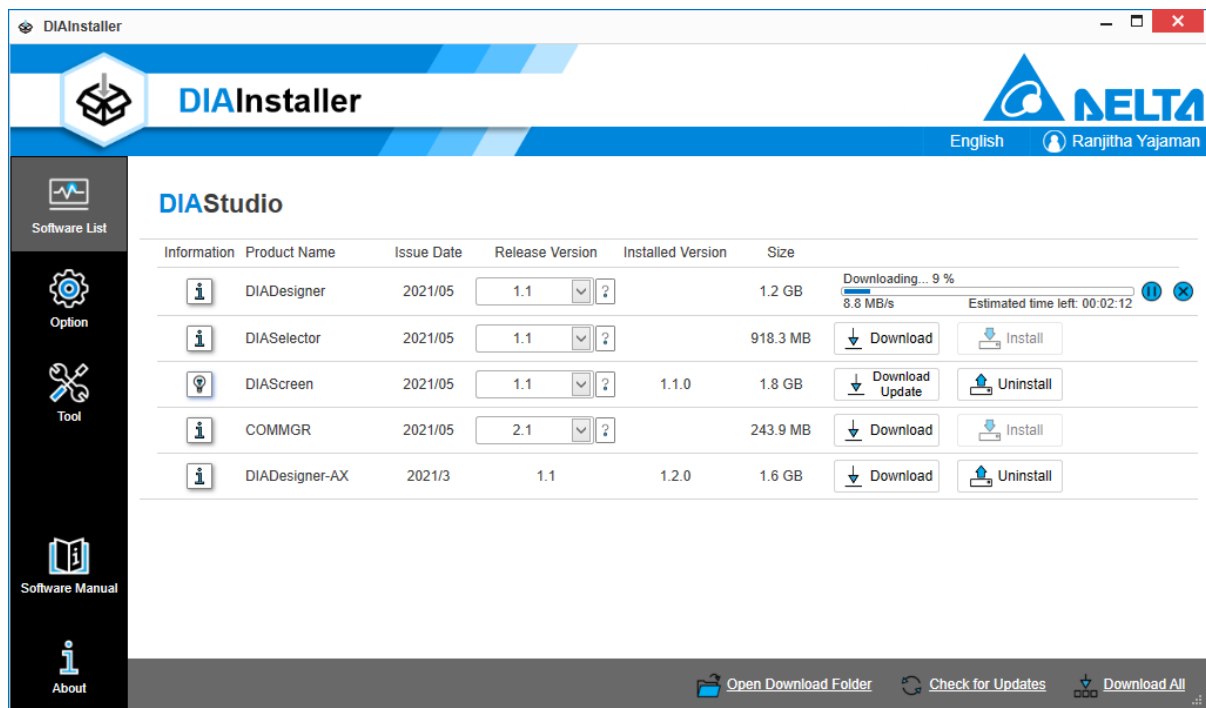

Figure 4 - 3: Software List

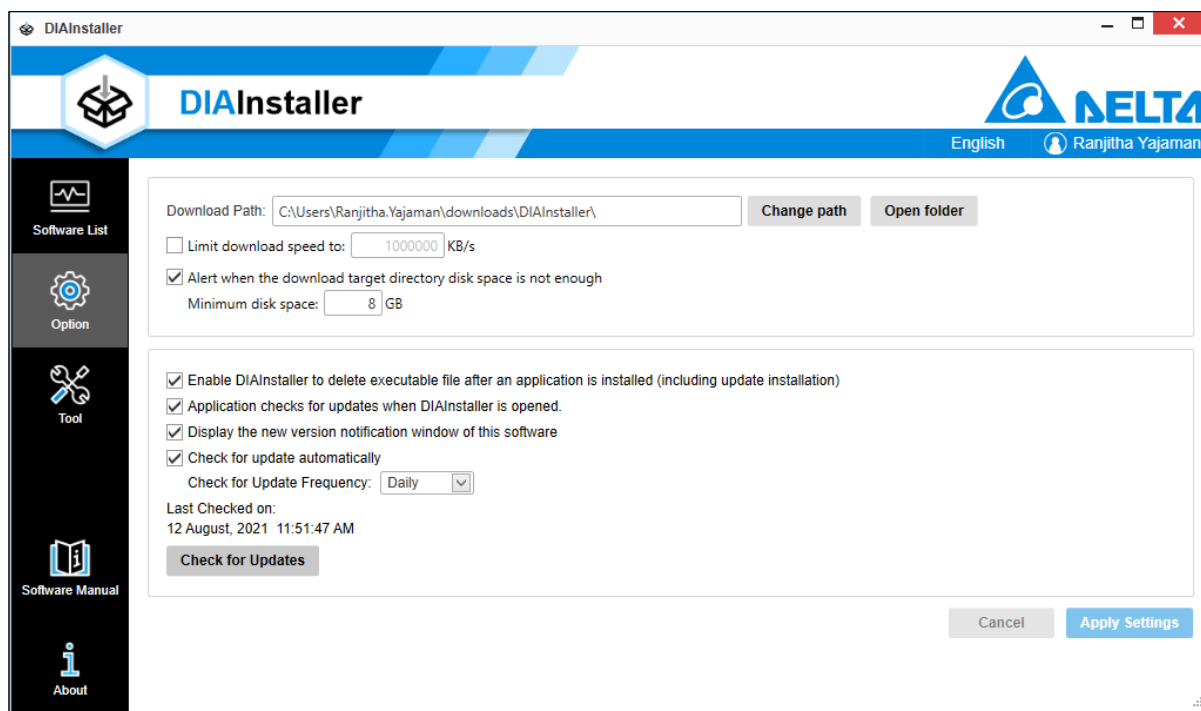

Functions in the **Software List** are described in the following table:

Features	Description
Product Information	After clicking the information icon, the Revision History can be opened.
Product Name	Name of DIAStudio software product.
Release Version	<p>The version number currently installed on the computer.</p>  <p>If the release version displays a drop-down menu, user can also download the desired software release version. Click the question mark  icon on the right to get the relevant version information.</p>
Installed Version	Latest version of corresponding product.
Size	Installation file size of corresponding product.
Download	Click to open Download folder when the files are downloaded.
Schedule	It shows the progress of downloading, installing, updating, download speed, estimated time left etc.
Install/uninstall	User can perform corresponding operations on the product through the install/uninstall button.
Open Download Folder	Open the path where the current file is stored.
Start Application	Run the selected product.
Check for Updates	User can check whether there is an updated version on the host.
Download All	User can download all the software at once.

## 4.2.2 Option

The Option page is as shown in the following figure:

**Figure 4 - 4: Option Tab**

The Option functions are described in the following table:

Features	Description
Download Path	Shows current download path, which can be changed through the <b>Change path</b> button on the right.
Open folder	Open the path where the current file is stored.
Limit download speed to	User can set the total rate of the download limit. User can check to change the limit, by default it is unchecked.
Alert when the download target directory disk space is not enough	Check this item, the target disk of the download path, the minimum disk space is less than the set space size, and a warning will pop up during download.
Minimum disk space	Set to limit the minimum disk space remaining on the target disk.

Features	Description
Enable DIAInstaller to delete executable file after an application is installed (including update installation)	It deletes the executable files after an application is installed.
Application checks for updates when DIAInstaller is opened	If this setting is enabled, when the software displays the screen, it will automatically check for updates.
Display the new version notification window of this software	Displays the new version notification.
Check for update automatically	The automatic update cycle can be set. (Daily). By default, this is updated on daily basis.
Check for Update Frequency	User can check whether there is an updated version on the host.
Check for updates	User can check for any available update.
Cancel	Click Cancel to ignore changes.
Apply Settings	Apply the modified settings after modification

### 4.2.3 Tools Tab Introduction

The DIAInstaller provides tool for different operating environments and compatibility issues.

The tool function description is as follows:

Function	Description
System environment repair tool	Fixes the problem when the DIASstudio series software has a startup error message and cannot run normally. Repair content: Modify the operating system (64/32 bit) environment settings.

### 4.2.3.1 Operating Instructions for System Environment Repair Tool

Follow the steps to execute the System Environment Repair Tool operating instructions:

1. In the **Tool** tab, click on **System Environment Repair Tool** icon to execute the tool.

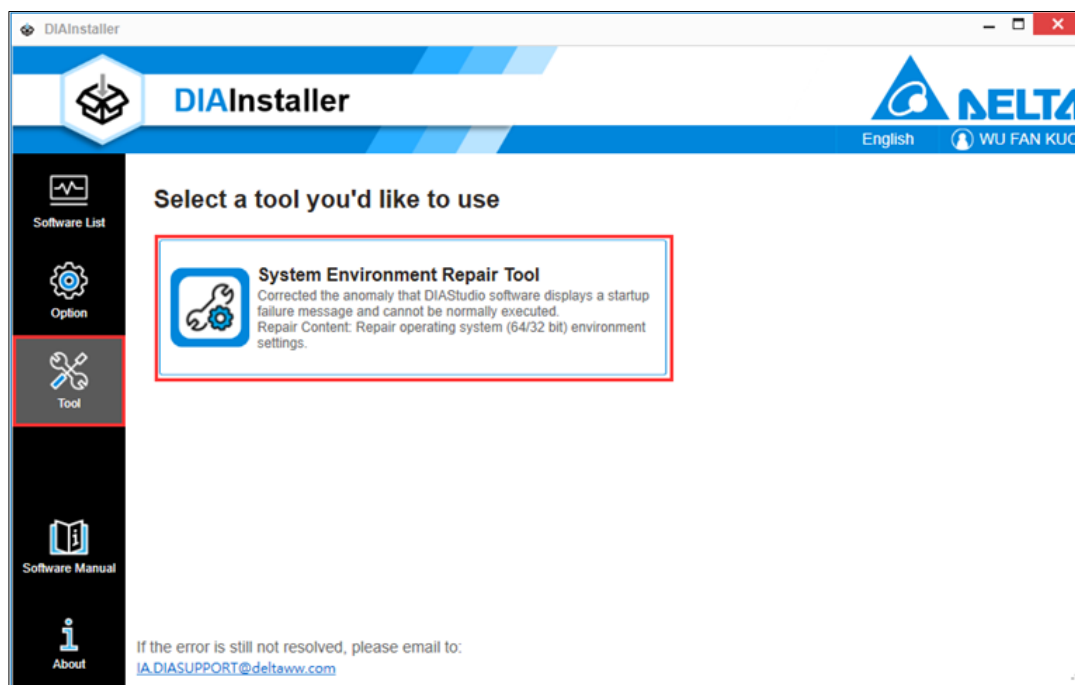

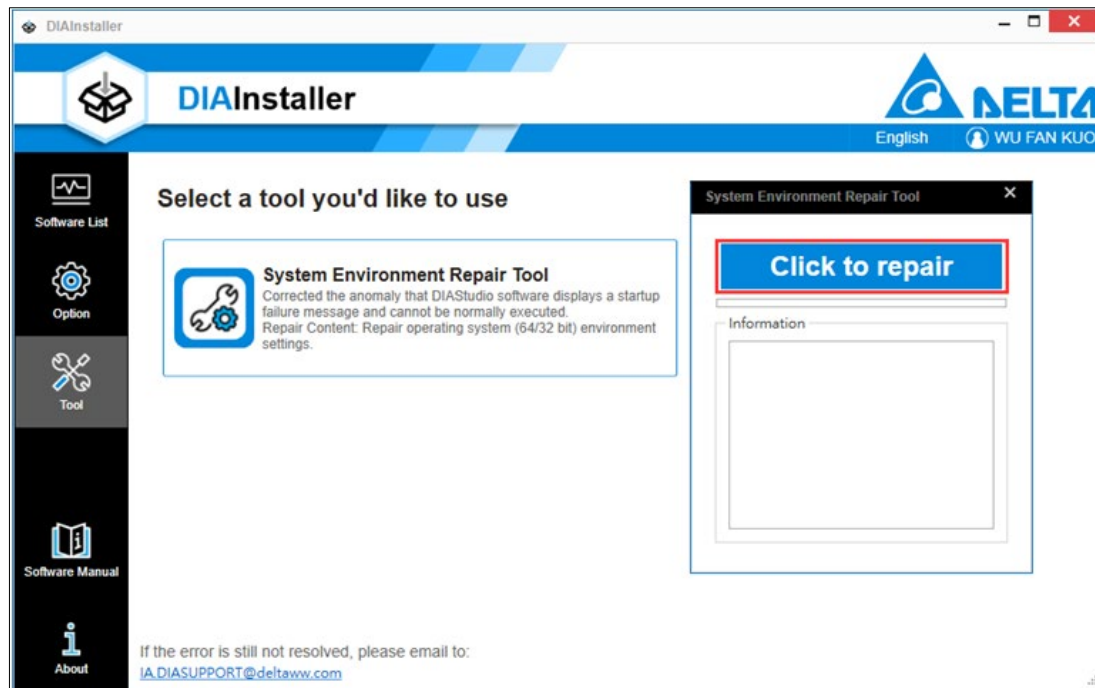

Figure 4 - 5: Tools Tab

**Result:** The **System Environment Repair Tool** window displays as shown in the following figure.

**Figure 4 - 6: System Environment Repair Tool Window**

2. Click on **Click to repair** button.

**Result:** The tool executes the repair function and displays the repair completion message as shown in the following figure.

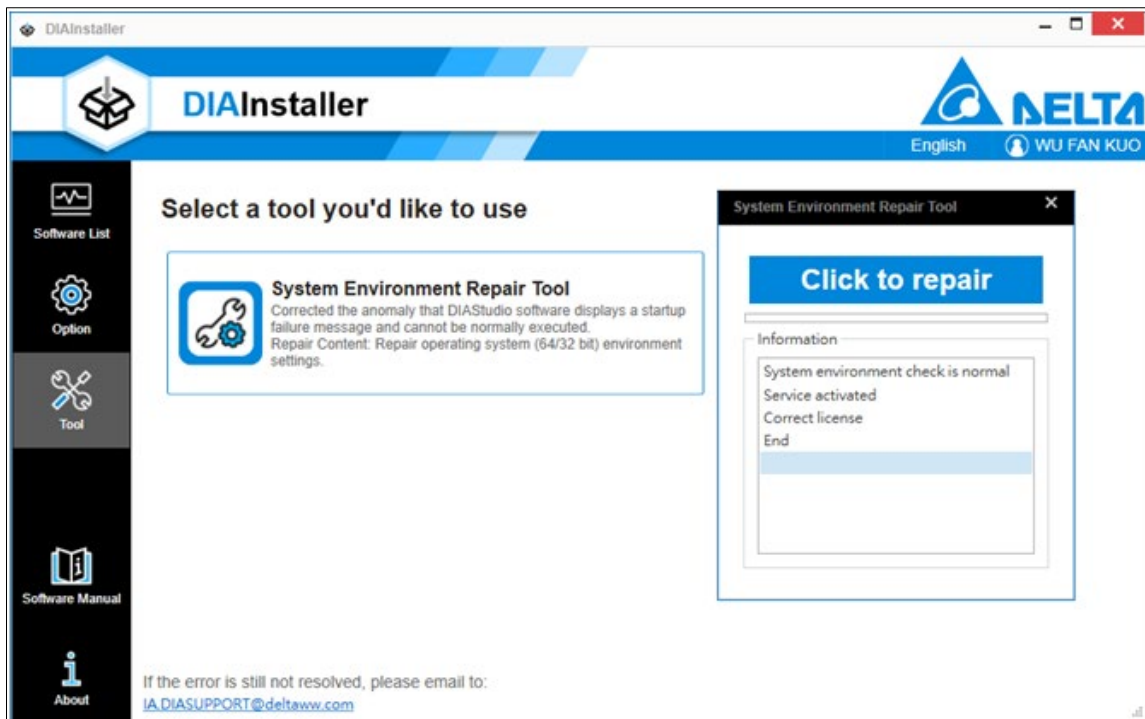

Figure 4 - 7: System Environment Repair Tool Output Message

## Chapter 5: Software List Operation

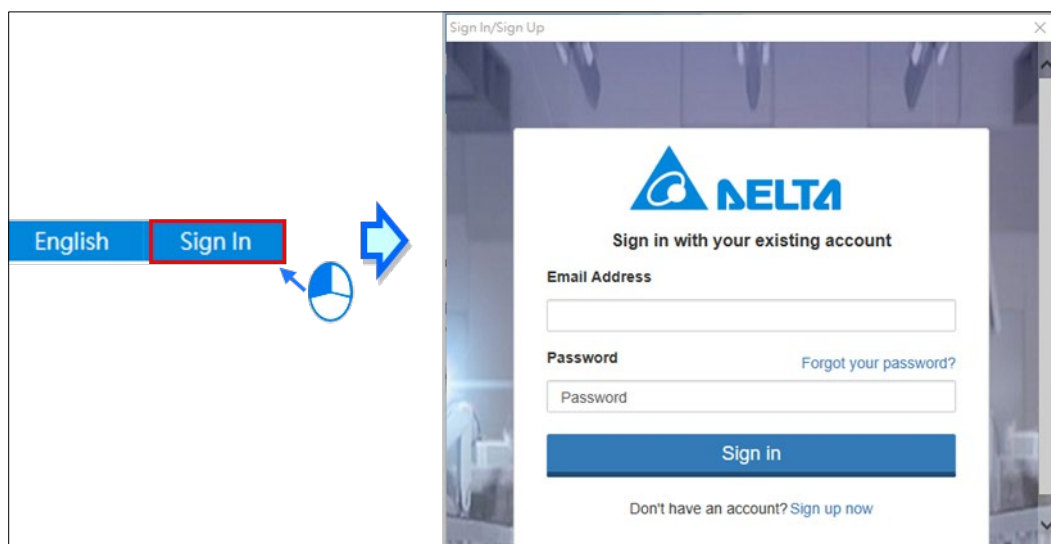

## 5.1 Introduction

User can download, install ([5.2 Downloading and Installing Software Products](#)), uninstall ([5.3 Uninstalling Software Products](#)), and update ([5.4 Update Software](#)) softwares in Software List page.

## 5.2 Downloading and Installing Software Products

Follow the steps below to install software:

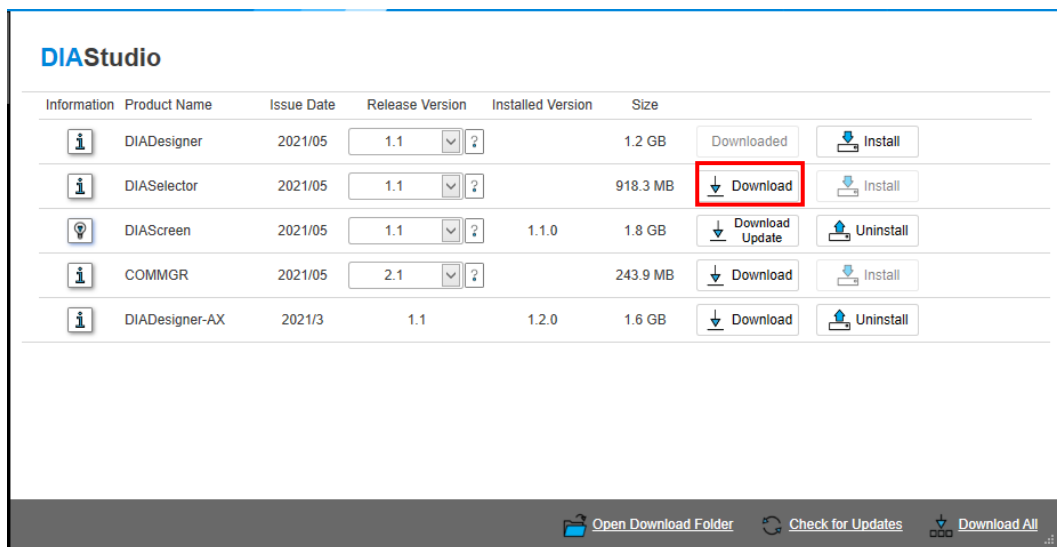

1. Sign in to download a software.

**Figure 5 - 1: Sign in Page**

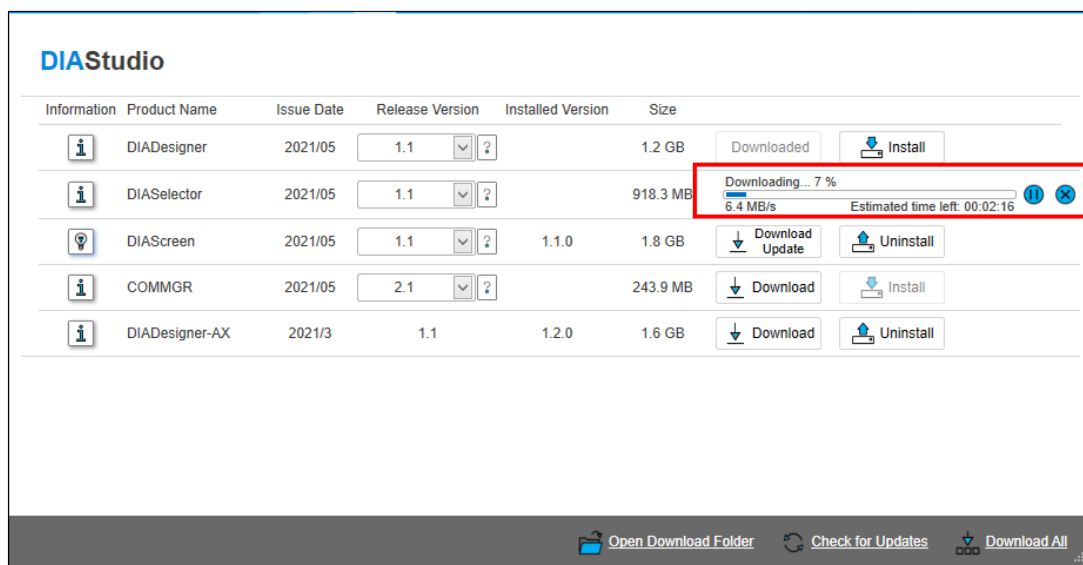

2. Select the product to download and click on **Download** button.

**Figure 5 - 2: Download Software**

**Result:** The download percentage progress is as shown in the following figure.

**Figure 5 - 3: Download Software Progress**

- After the software is downloaded, click **Install** button to pop up the installation file of each installer and start the installation.

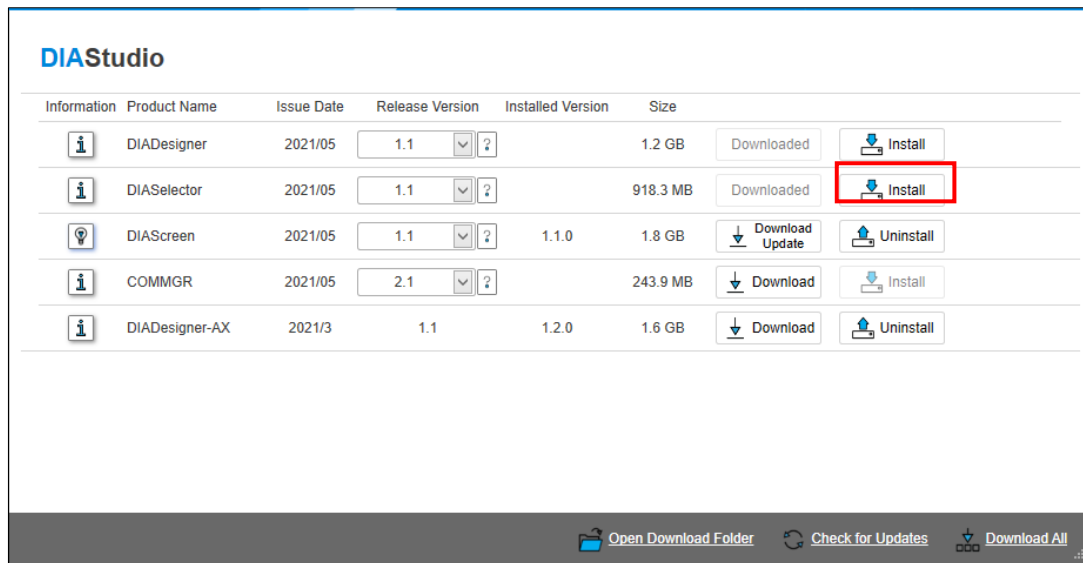

Figure 5 - 4: Install Software

4. When a particular software installation is going on, other software cannot be installed, until the present installation is completed.

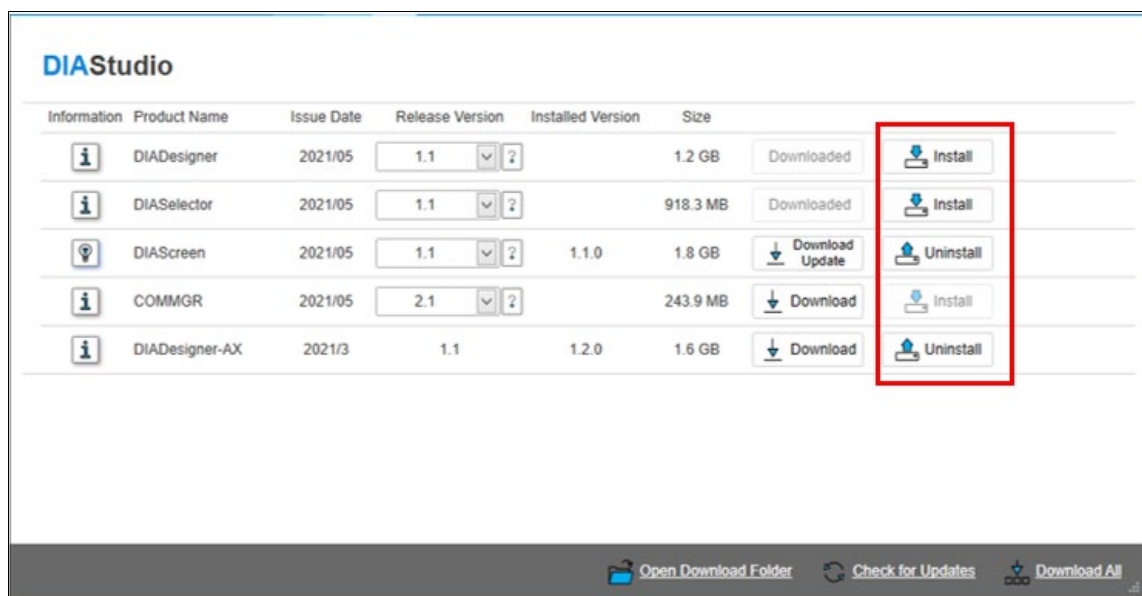

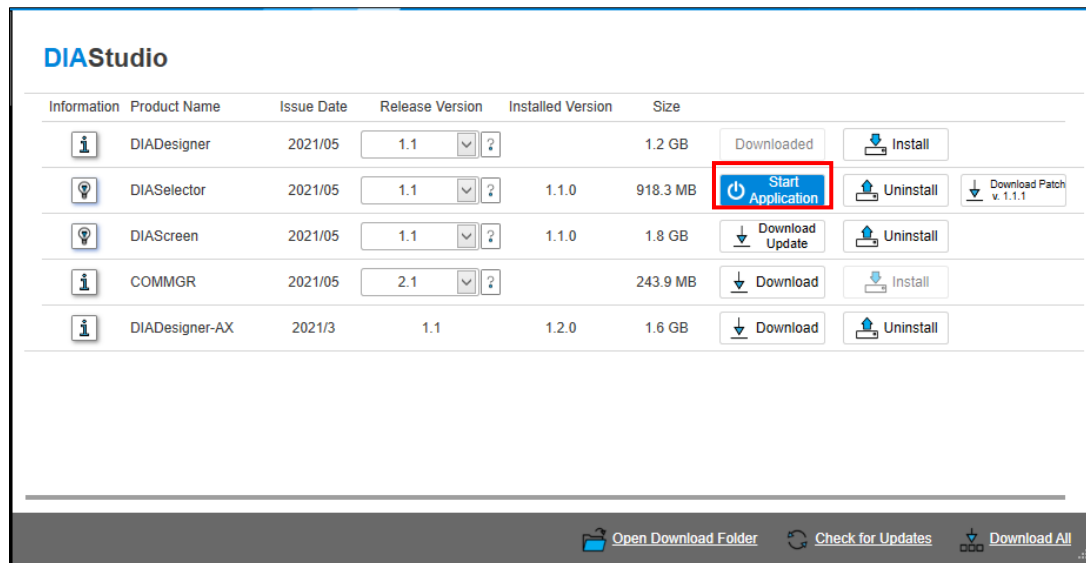

Figure 5 - 5: Software Installation

5. After the installation is complete, it will be displayed as the **Start Application**.

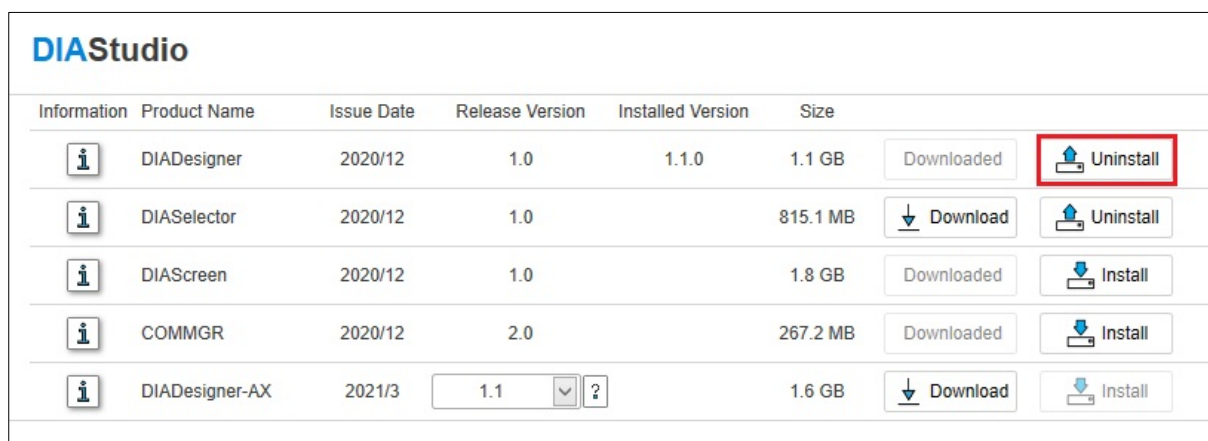

**Figure 5 - 6: Software Installation is complete**

### 5.3 Uninstalling Software Products

Follow the steps to uninstall software:

1. Open DIAInstaller and click on **Uninstall** button on product to be uninstalled.

**Figure 5 - 7: Uninstall Software**

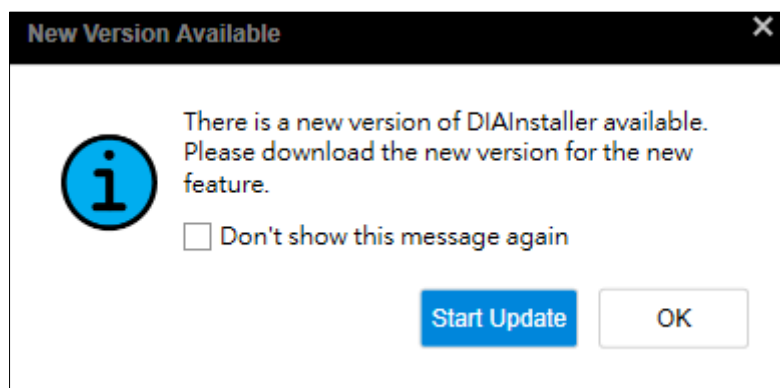

2. The uninstall package of the software will pop up. After uninstalling, the status of the software will change to **Install**.

DIAStudio						
Information	Product Name	Issue Date	Release Version	Installed Version	Size	
	DIADesigner	2020/12	1.0		1.1 GB	Downloaded
	DIASelector	2020/12	1.0		815.1 MB	Download
	DIAScreen	2020/12	1.0		1.8 GB	Downloaded
	COMMGR	2020/12	2.0		267.2 MB	Downloaded
	DIADesigner-AX	2021/3	1.1		1.6 GB	Download

**Figure 5 - 8: Software Uninstall Complete**

## 5.4 Update Software

DIAInstaller provides a self-update function. When the system shows that a new version is available for download, user can click to start the update and download the update.

**Figure 5 - 9: Update available for download**

User can also check whether there is a newer version of the software through manual or automatic checking.

### 5.4.1 Check for Update Manually

Click **Option** tab, and click on **Check for Updates** button. The system will check for any updates for all products.

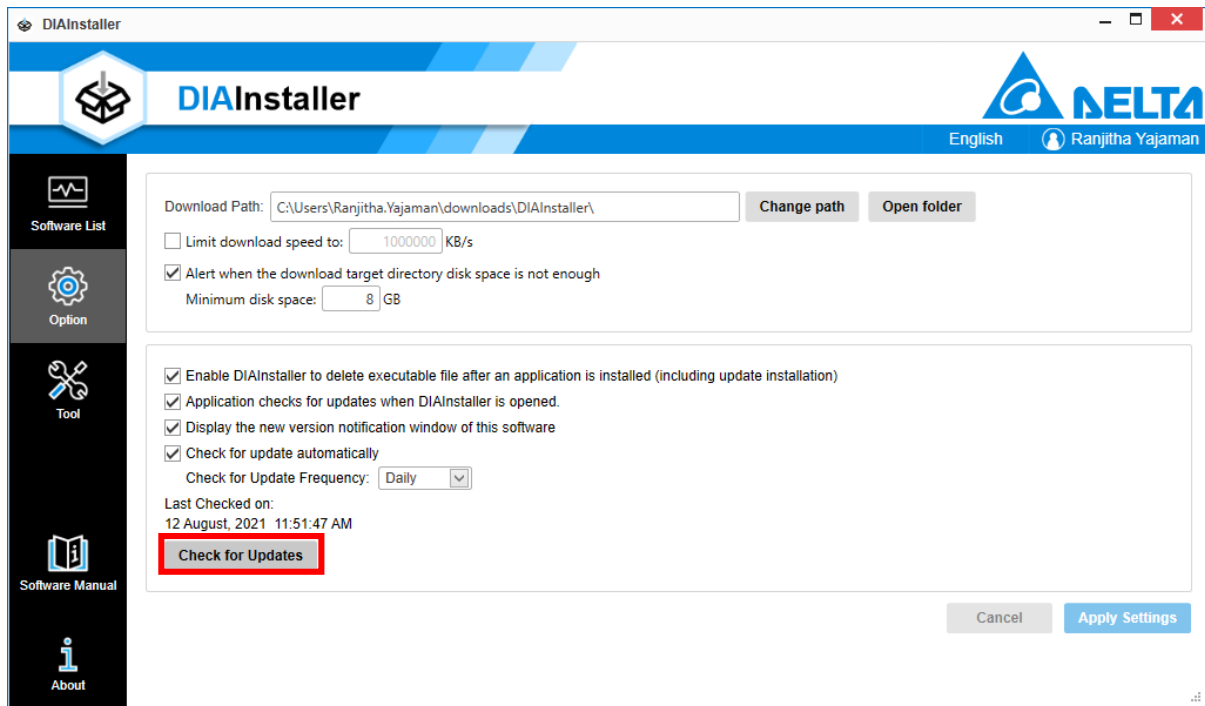

Figure 5 - 10: Check for Updates Manually

### 5.4.2 Check for update automatically

A check for updates will be performed every time the computer is restarted; user can also set the automatic update frequency during the computer's turn on,

Follow the steps to check for updates automatically:

1. Select **Check for update automatically** and Select **Check for Update Frequency**. The default update frequency is **Daily**.

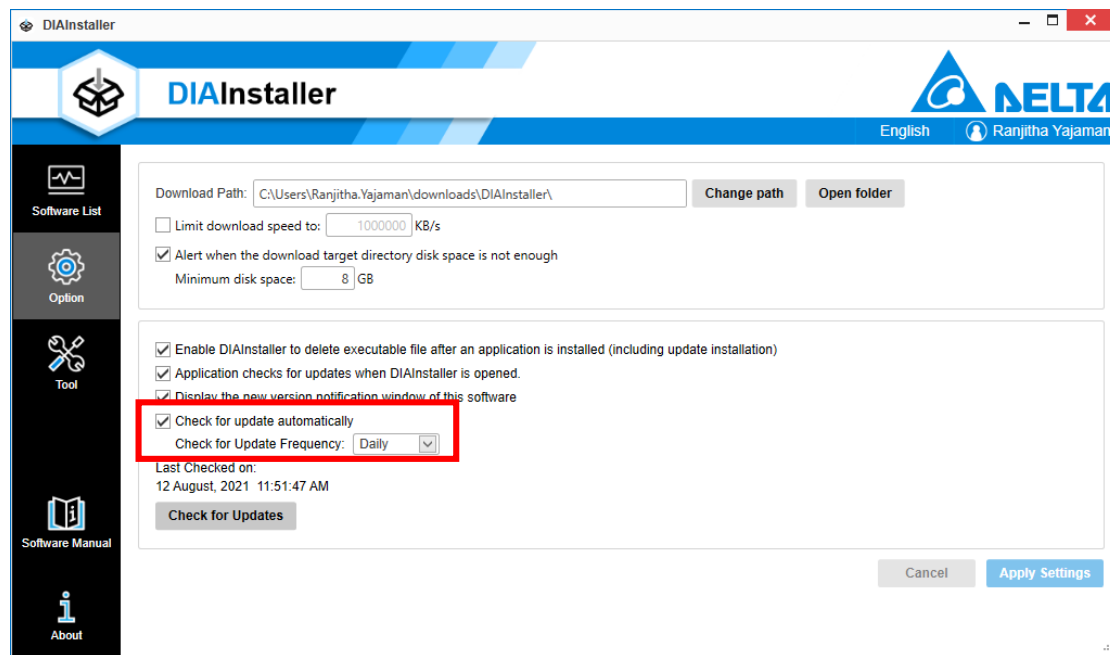

Figure 5 - 11: Check for Update Automatically

2. Click on **Apply Settings** to change the settings.

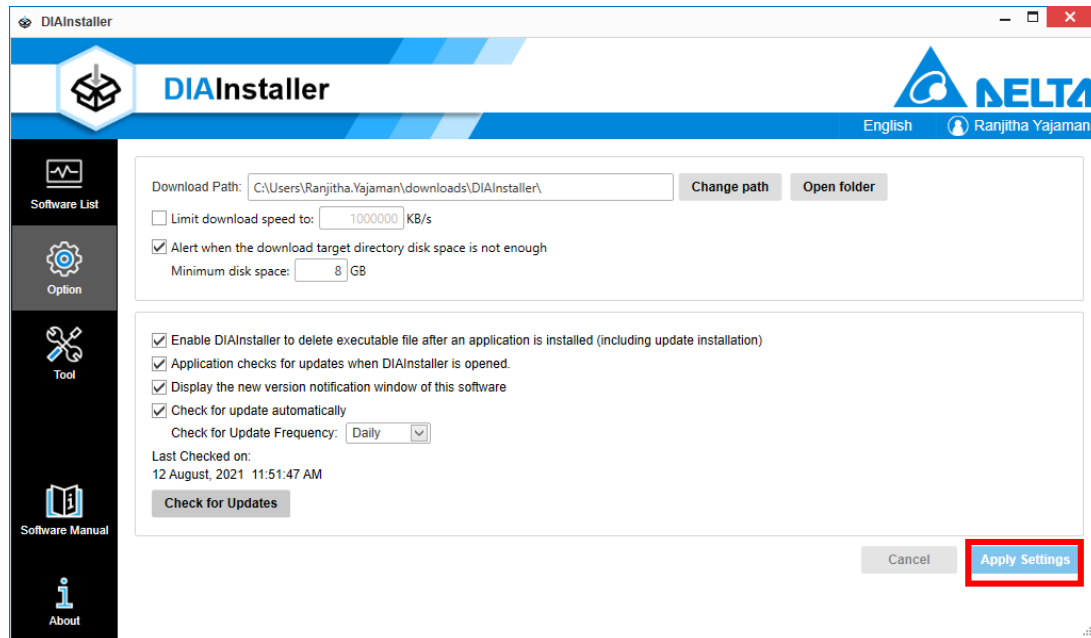

Figure 5 - 12: Apply Settings

**Result:** System will check for update automatically according to user setting.

### 5.4.3 Update Software (When there is a new version of software available)

Follow the steps to update a software:

1. Open the **Software List**. If there is a new version of the installed software available, the new version icon will be displayed .

DIASStudio						
Information	Product Name	Issue Date	Release Version	Installed Version	Size	
	DIADesigner	2020/12	1.0	1.1.0	1.1 GB	 
	DIASelector	2020/12	1.0		815.1 MB	 
	DIAScreen	2020/12	1.0		1.8 GB	 
	COMMGR	2020/12	2.0	2.1.0	267.2 MB	 
	DIADesigner-AX	2021/3	1.1  	1.0.0	1.6 GB	 

**Figure 5 - 13: Update Software Information**

2. Click on **Download Update**, to start downloading the latest update.

DIASStudio						
Information	Product Name	Issue Date	Release Version	Installed Version	Size	
	DIADesigner	2020/12	1.0	1.1.0	1.1 GB	 
	DIASelector	2020/12	1.0		815.1 MB	 
	DIAScreen	2020/12	1.0		1.8 GB	 
	COMMGR	2020/12	2.0	2.1.0	267.2 MB	 
	DIADesigner-AX	2021/3	1.1  	1.0.0	1.6 GB	 

**Figure 5 - 14: Download Update**

3. After download is complete, click on **Update Installation** button to update the product.

DIAStudio						
Information	Product Name	Issue Date	Release Version	Installed Version	Size	
	DIADesigner	2020/12	1.0	1.1.0	1.1 GB	Download Uninstall
	DIASelector	2020/12	1.0		815.1 MB	Download Install
	DIAScreen	2020/12	1.0		1.8 GB	Download Install
	COMMGR	2020/12	2.0	2.1.0	267.2 MB	Download Uninstall
	DIADesigner-AX	2021/3	1.1	1.0.0	1.6 GB	Update Installation Uninstall

**Figure 5 - 15: Update Installation**

**Result:** After installation, the status will display installed.

#### 5.4.4 Software update (when there is a new patch)

Open the **Software List**. If there is a new patch for the installed software, the patch icon will be displayed at the back.

Follow the steps to update the software:

1. Click on **Download Patch**.

**Result:** Once the download is complete, it displays as **Install Patch**.

2. Click on **Install Patch** to install the patch file.
3. After the installation is complete, user can see the version changes.

**Figure 5 - 16: Install Patch File**

**Remarks:**

5.4.3 Update Software (When there is a new version of software available)

introduces software updates when new versions of software are available; 5.4.4 Software update (when there is a new patch) introduces software updates when new patches are available. The differences between the two are as follows:

- Software update when there is a new version of the software: When a new version of the software is released, user can choose to reinstall the new version to use the new features of the new version, but the entire installation process will take a long time.
- Software update when there is a new patch: When the current software version has major updates or corrections, user can choose to install patches to update some components, which saves time.
