

Digitized Automation for a Changing World

Delta Door Control Drive & Motor VFD-DD Series

Door Drive Functions and Features

User Friendly Design

Door Control Solutions

• Distance Control Mode

For encoder applications this mode precisely controls the door's opening and closing position via encoder feedback signal.

• Speed Control Mode

For induction motor applications this mode executes door opening and closing via 2~4 limit sensors or switch sensors.

• Multi-step Speed Control Mode

For PLC applications this mode uses Delta's PLC as a host controller to control door opening and closing in multi-step speeds.

Built-in Door Control Functions

- **Door Width Auto-tuning**

Door width is automatically measured and saved as the door opens and closes. It will open and close twice to confirm the door width accuracy. Once confirmed, the measurement is recorded into the drive parameters.

- **Smooth Door Curve**

The door will reopen in a reverse direction when door blockage is detected. The reopen is performed with a smooth curve to minimize the impact of vibration.

- **Demo Mode**

Demo mode demonstrates the door open, close and reverse motions to ensure the performance and quality of the drive system and the door structure.

- **Asynchronous (IM) and Synchronous (PM) Motors Applications**

Compatible with Delta ECMD series door control servo motor and other induction motors (signal type encoder that accepts open collector and differential signal with 5, 12 or 24 V_{DC}).

- **Door Protection System**

Passengers enter and exit the elevator with greater safety. When the light curtain and safety panel fail to function, the drive will command the door to re-open as it detects a rise of current caused by the blocked door.

- **Blockage Detection**

- Precise torque detection at blockage
- Door remains at current position for a few seconds
- Door "OPEN/CLOSE" time-out
- Forced open

- **Built-in EMI Filters**

(except for Basic Models)

Specifications

230V 1-phase: 200W and 400W models				
Model Number VFD-___DD	001	002	004	
Max.Applicable Motor Output (W)	100	200	400	
Output Rating	Rated Output Current (A)	0.3	1.0	
	Rated Output Current for Constant Torque (A)	0.8	2.5	
	Maximum Output Voltage (V)	Proportional Double Input Voltage	Proportional Input Voltage	
	Output Frequency (Hz)	0.00 ~ 120.00		
	Carrier Frequency (kHz)	10		
	Rated Input Current (A)	3	4.9	6.5
Environment	Voltage Tolerance (V)	Single Phase 100 ~ 120 (-15 ~ +10%) (85 ~ 132)	Single Phase 200 ~ 240 (-20 ~ +10%) (160 ~ 264)	
	Frequency Tolerance (Hz)	50/60 ± 5% (47 ~ 63)		
Cooling Method	Natural Cooling			
Frame (mm)	215 (W) × 170 (H) × 55 (D)			

General Specifications

Control Mode		V/F · VF+PG · SVC · FOC+PG · PMFOC+PG	
Control Features	Starting Torque	At 0.5Hz, starting torque reaches above 150% at 0.5Hz; under FOC+PG mode, starting torque reaches above 150% at 0Hz	
	Speed Control Range	1: 100 (external PG installation can achieve 1: 1,000)	
	Speed Control Accuracy	± 0.5% (external PG installation can achieve 0.02%)	
	Speed Response Ability	5Hz (vector control can attain 30Hz)	
	Max. Output Frequency	0.00 to 120.00Hz	
	Output Frequency Accuracy	Digital command ±0.005%	
	Frequency Setting Resolution	Digital command ±0.01Hz	
	Torque Limit	200% torque current as maximum	
	Accel/Decel Time	0.00 ~ 600.00sec	
	V/F Curve Pattern	Adjustable V/F curve of 4 independent points	
Operation Features	Frequency Setting Signal	Keypad	By parameter setting
		External Signal	Multi-function input selection 1~5 (16 steps; JOG), parameter setting on serial COM port (RS-485)
	Operation Setting Signal	Keypad	Set by OD, CD, STOP keys
		External Signal	2 wires (OD, CD), JOG operation, RS-485 serial COM port, demo mode
	Multi-Function Input Signal	Multi-step speed selection MI1~MI15, two steps accel/decel switches, JOG, demo mode, forced stop, emergency stop, operation command source, parameter lock, driver reset, open/close limit signal, open/close variable speed signal, door open prohibited signal, forced open signal, reposition, two steps accel/decel and high speed open/close switch	
Multi-Function Output Signal	(RC1, RA1, RB1), (RC2, RA2, RB2), (MO1, MO2, MO3 and MCM) AC drive operating, frequency attained, over torque, over voltage, operation mode, fault indication, alarm indication, demo mode indication, overheat alarm, drive is ready, emergency stop, braking signal, zero speed indication, PG error indication, position detection, limit signal, reopen/ close indication, position finished		
Communication Interface		Built-in Modbus, customized CAN bus	
Alarm Output Contact		Contact "ON" when malfunctions occur (relay with a "C" or "A" contact, or 2 open collector outputs)	
Operation Function		AVR, 6 sets of fault records, door open prohibition, DC brake, auto torque compensation, slip compensation, motor parameter auto-tuning, adjustable carrier frequency, output frequency upper and lower limits, parameter rest, vector control, Modbus communication, anomaly rest, anomaly restart, PG feedback control, fan mode selection, demo mode, door width auto-tuning	
Protection Function		Over-voltage, over-current, under current, external fault, motor overload, ground fault, drive overload, drive overheat, electronic thermal relay, PG feedback error, external limit signal error, door close anomaly protection	
Built-in Keypad		7 function keys, 4-digit 7-segment LED, 5 status LEDs; displays frequency command, actual output frequency, output current, user-defined units, parameter values for setup, review and faults, RUN, STOP, RESET, FWD/REV	
Built-in EMI filter		Certified to EN55011 CLASS A (Basic models excluded)	
Protection Features	Motor Protection	Electronic thermal relay protection	
	Over Current Protection	The current forces 180% of the over-current protection and 240% of the rated current	
	Overload Capacity	150% for 120 seconds; 180% for 10 seconds	
	Voltage Protection	Over-voltage level: $V_{DC} > 400V$; low-voltage level: $V_{DC} < 200V$	
	Over-voltage Protection for Input Power	Varistor (MOV)	
	Overheat Protection	Built-in temperature sensor	
Environment	Enclosure Rating	IP20	
	Operation Temperature	-10°C ~ 40°C	
	Ambient Temperature	-20°C ~ 60°C	
	Ambient Humidity	Below 90% RH (non-condensing)	
	Vibration	1.0 G, while frequency is less than 20Hz; 0.6G while frequency is between 20~60Hz	
	Installation Location	Altitude 1,000 m or lower, keep from dust, sunlight, corrosive and flammable gas	
Certification		UL, CE, *IEC61800-3	

** Input reactor is required to be compliant with EMC harmonic standards (IEC 61000-3-2 & 4)

Model Name of Door Drive

Servo Motors ECMD Series

- 55mm thin design
- Instant torque up to 5N-m
- Maximizes installation flexibility
Both sides of motor can be installed
- Motor temperature detection and overheating protection

Specifications

Model		ECMD-B91207M_	ECMD-B91608M_	ECMD-B81610M_
Applicable DD Drive		100/200/400W	200/400W	200/400W
